

Disruption—but Ultimately for our Benefit (11-6-18)

Over the next three weeks there will be around 6 articulated lorries, probably with a guidance car, passing through the centre of Cropwell Bishop every day—including weekends.

They will be transporting giant precast concrete panels (6m x 3.5m and weighing 13 tons) to the Sewage Treatment Works off Cropwell Butler Road. The panels will be used in the construction of a tank for Severn Trent.

The contractor will look to reduce deliveries during school pick-up and drop-off times. However, they would greatly appreciate it if the route they are taking could be kept clear during the period of these deliveries. Deliveries will take place from 07:30 to 20:00 every day until 1st July.

Lorries will come from the A46 and enter the Village on Nottingham Road. They will turn left onto Church Street and then make their way to Cropwell Butler Road where they will off right to the Sewage Works.

Should the need arise, you can contact the Customer Liaison Team by Freephone (08081 688 140) or email (contactus@nmcnomenca.co.uk) quoting the project title (Cropwell Bishop STW Quality).
