There will be an opportunity for all who attend to ask questions and hear tips and ideas on the countless exciting ways to get involved in the event, before, during and after it flies through the Borough on September 8.

It will include how you can decorate your house, business or neighbourhood in a cycle theme to welcome the riders or create your own land or water art that could be captured by the live coverage on ITV4.

The event will also provide further information about the route, timings and potential volunteer opportunities.
